

# ENLIVEN™

Fueled By  
YIELD BURST

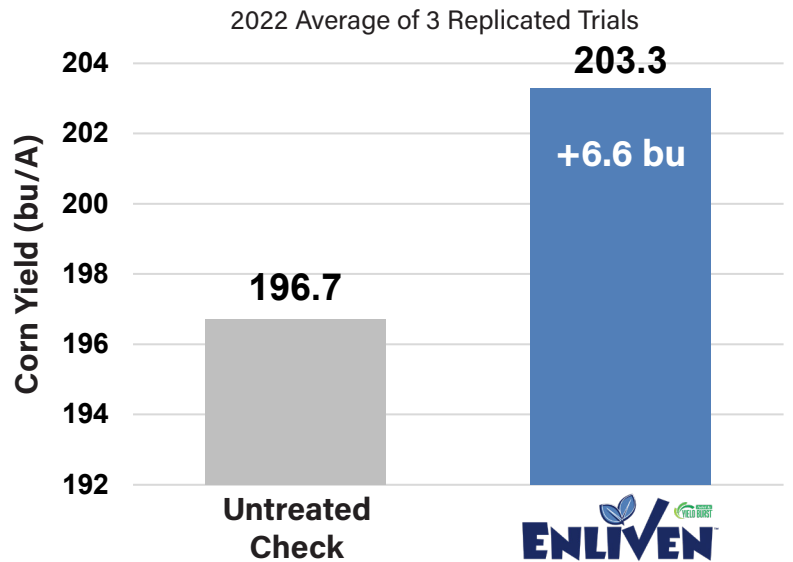

## FEATURES AND BENEFITS

- Enliven is a convenient, all-in-one adjuvant with NIS, AMS, and HPG Technology.
- Fueled by Yield Burst Technology, Enliven provides efficient energy at the time of application to help the crop metabolize herbicides more quickly and grow through stress.
- Enliven's premium adjuvant package delivers more consistent weed control and improved crop safety for a proven yield advantage.

**Use Rate: 16 oz/Acre**

# Yield Burst Advantage

Yield Burst™ Technology fuels crop growth and promotes increased yields by providing a unique blend of biostimulant actives that maximize crop efficiency and supply readily available energy to the crop.

- May include: amino acids, amino acid blends, vitamins, organic acids, dicarboxylic acids, or other biostimulant actives
- Each product is formulated at specific ratios to maximize crop enhancement
- University studied and proven to promote yield in a variety of cropping systems
